Summary

Full-stack developer with over four years of experience building web applications using Next.js, React, TypeScript, Node.js, and MongoDB. Focused on clean, maintainable code, responsive interfaces, and efficient API integration, using AI tools to support development without compromising code quality.

Technical Skills

- **Frontend -** Javascript, Reactjs, Nextjs, Redux, Tailwindcss, Framer motion, Gsap
- **Backend -** Nodejs**,** Expressjs**,** TypeScript
- **DataBase -** MongoDB
- **AI Tools** - ChatGPT, Claude, Gemini, Perplexity

Project Work – (The projects will be updated soon)

[MoviX](#) - Movie   *Jan 2024 – Feb 2024*

- Built a fully responsive movie web application using React and Tailwind CSS.
- Integrated TMDB API to fetch and display dynamic movie data.
- Implemented lazy loading, loading states, and reusable components.

YouTube - Clone   *June 2024 – July 2024*

- Developed a YouTube-style application with feed, search, video detail, and channel pages.
- Integrated external APIs for video data and search functionality.
- Focused on responsive layouts, image lazy loading, and UI consistency.

[Google](#) - Clone   *Dec 2024 – Jan 2025*

- Built a fully clone of Google
- Focused on clean UI, smooth animations, and clear layout structure.
- Implemented lazy loading, loading states, and reusable components.
